Claims 31-34 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on August 5, 2005. Also, the applicant will note that Claim 31 has been withdrawn from the consideration since this claim does read on the elected species.

Claim 35 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In particular, the claim contains redundant language which makes it unclear exactly what the applicant intends to claim.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 8, 24, 25, 27 and 35 (as understood) are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim

Art Unit: 3747

7 of U.S. Patent No. 6,631,706. Although the conflicting claims are not identical, they are not patentably distinct from each other because this claim of applicant's prior patent includes all of the claimed features of the applicant's noted claims with only slightly different wording being used in several instances.

Claims 11-14, 26, and 28-30 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 7 of U.S. Patent No. 6,631,706 in view of Kraemer. In particular, Kraemer teaches a fuel pump including a n inlet valve which is operated as is applicant's valve and includes all of its features except the second biasing spring.

It would have been obvious to apply the claimed device to an injection pump of the type taught by Kraemer since the claimed device merely requires some type of fuel feed pump.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8, 24, 25, 27 and 35 (as understood) are rejected under 35 U.S.C. 102(b) as being anticipated by Kraemer.

In particular, Kraemer applies as noted above.

Finally, the applicant will note that the references in the IDS of 3/19/04 have been lined through since they appear to be totally unrelated to this case and were probably meant to be filed in a different case having a closely related serial number.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
